HAVING TROUBLE WITH YOUR ELECTRICAL SYSTEM?
WE'VE GOT YOU COVERED WITH OUR...

TROUBLESHOOTING GUIDE

I'M A GLITCH AND I LIKE TO HIDE IN YOUR HOME'S ELECTRICAL SYSTEMS! I LIKE TO CAUSE PROBLEMS! HERE'S SOME EXAMPLES OF WHAT I DO...

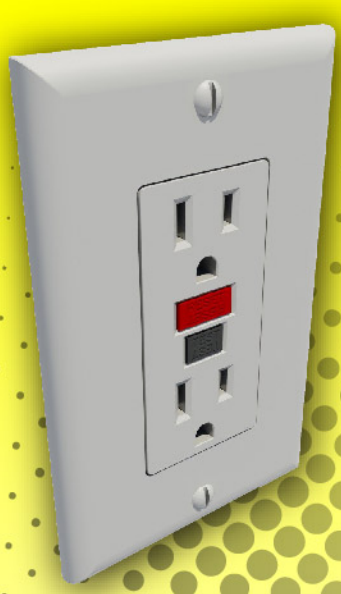
JETTED TUB GFCI BREAKERS

ARE USED FOR JETTED TUBS. THESE BREAKERS ARE USUALLY LOCATED BESIDE THE ELECTRICAL PANEL

IF YOUR TUB ISN'T WORKING, TRY DEPRESSING THE "RESET" OR "TEST" BUTTON, THEN TURN THE BREAKER COMPLETELY OFF, THEN BACK ON AGAIN.

IF YOU HAVE ANY QUESTIONS OR REQUIRE SERVICE, PLEASE CALL 24/7 ELECTRIC AT:

480.530.7755



GFCI OUTLET

GFCI PROTECTED OUTLETS ARE USED FOR BATHROOMS AND EXTERIOR WEATHERPROOF PLUGS. THE GFCI RESET BUTTON FOR YOUR EXTERIOR PLUGS WILL BE LOCATED ON THE EXTRIOR OUTLET EITHER AT THE FRONT OR REAR OF THE HOUSE, OR NEXT TO THE ELECTRICAL PANEL. THE RESET BUTTONS FOR YOUR BATHROOM PLUGS WILL BE LOCATED IN EITHER THE MAIN OR ENSUITE BATHROOM OUTLETS.

IF EITHER PLUG ISN'T WORKING, UNPLUG ALL APPLIANCES AND DEPRESS THE RESET BUTTON IN THE CENTRE OF THE OUTLET.

SMOKE/CO^2 DETECTORS

LOCATED ON EACH LEVEL AND INTERCONNECTED WITH EACHOTHER. EACH UNIT SHOULD BE TESTED WEEKLY.

FAMILIARIZE YOURSELF WITH THE INSTRUCTION MANUAL. IF THE UNIT DOES NOT RESPOND DURING TESTING, CALL US FOR IMMEDIATE SERVICE.

RANGE, COOKTOP OR WALL OVEN

WALL OVEN: FUSES ARE LOCATED IN THE CUPBOARD ADJACENT TO THE UNIT
RANGE OR COOKTOP: FUSES ARE LOCATED UNDER THE COOKING SURFACE OR UNDER THE MAIN OVEN CONTROLS

IF THE APPLIANCE FAILS TO OPERATE, CALL US FOR IMMEDIATE SERVICE.

DID YOU KNOW?!

IF YOUR HOME WAS BUILT BETWEEN THE 1960S AND EARLY 1970S, YOUR HOME WAS PROBABLY WIRED WITH ALUMINUM WIRING. HOMES AFTER THE MID 1970S WERE BUILT USING COPPER WIRING. ALUMINUM WIRING WAS FOUND TO BE A FIRE HAZARD.

IF YOUR HOUSE WAS BUILT IN THIS TIMEFRAME, PLEASE CALL US FOR A CONSULTATION!

WALL OUTLET

THESE COMMON OUTLETS ARE LOCATED THROUGHOUT THE ROOMS IN YOUR HOME.

IF BOTH OR HALF THE PLUGS ARE NOT OPERATIONAL, TRY TURNING ON ALL THE SWITCHES IN THE AREA. SOME PLUGS MAY BE CONTROLLED BY A SWITCH.

GAS FIREPLACE

POSSIBLE LOCATIONS INCLUDE LIVING ROOMS, BASEMENTS OR BEDROOMS.

TYPICAL GAS FIREPLACES WILL HAVE TWO SWITCHES. ONE WILL BE THE IGNITER. THE SECOND SWITCH WILL OPERATE A PLUG UNDERNEATH THE FIREPLACE. THIS PLUG ACCOMODATES AN OPTIONAL FAN.

TRIPPED BREAKER

BREAKERS ARE LOCATED IN THE ELECTRICAL PANEL, WHICH IS USUALLY IN THE BASEMENT OR UTILITY ROOM.

BREAKERS TRIP DUE TO OVERLOADS OR SHORT CIRCUITS. IF ELECTRICAL EQUIPMENT OR APPLIANCES STOP WORKING, IT COULD MEAN A TRIPPED BREAKER. TO RESET A TRIPPED BREAKER, TURN THE SWITCH TO THE OFF POSITION, THEN BACK ON.

DONT LET A GLITCH TAKE OVER YOUR HOME! IF YOU HAVE ANY QUESTIONS OR REQUIRE ASSISTANCE, CALL OR VISIT!
